

**Information service dedicated to professionals in the watchmaking industry**

Watch Industry Int'l News is a **digest of current affairs** in the watchmaking industry. Every week, the service provides the latest **economic, commercial and technological information** from the horological field.

Its coverage is **world-wide**.

The information, classified by topics, can be easily consulted. Documents are often enhanced by complementary information and illustrations. A **search engine** enables the reader to access archived documents very rapidly.

**The electronic edition** of Watch Industry Int'l News Digest can be accessed via Internet using confidential codes. Updated on a **weekly** basis, it contains information and documents published in English, French and German.

**The paper edition**, published on a **monthly** basis, includes part of the information published online. Documents are in English.
