

See beyond patents

RAPID is a multi-source monitoring solution to manage all the strategic information flows of your company on a single platform. A leader in patent monitoring for over ten years, RAPID 3.0 now extends to news and scientific publications, covering the most demanding needs in the fields of intellectual property, technical, scientific and competitive information.

COMPREHENSIVE

RAPID 3.0 combines three monitoring modules – patents, news and articles – into a single comprehensive platform. Each of these modules draw on multiple sources in their field, and interact to deliver a complete view of all your strategic information: patents, designs, scientific publications, technical and economical information, norms, news, etc.

POWERFUL

RAPID 3.0 offers powerful functionalities to collect, process, organize and enrich your strategic information. It provides specific tools and features for each information type, developed from the latest best practices in technology monitoring. **RAPID**'s intuitive interface and advanced toolsets provide a unique mix of power and ease of use.

COLLABORATIVE

RAPID 3.0 allows you to easily share and distribute the results of your monitoring: create customized reports and selective alerts for specific groups and topics, allow users to comment, enrich and qualify shared intelligence. Keep close control of your information.

RAPID 3.0

PATENTS

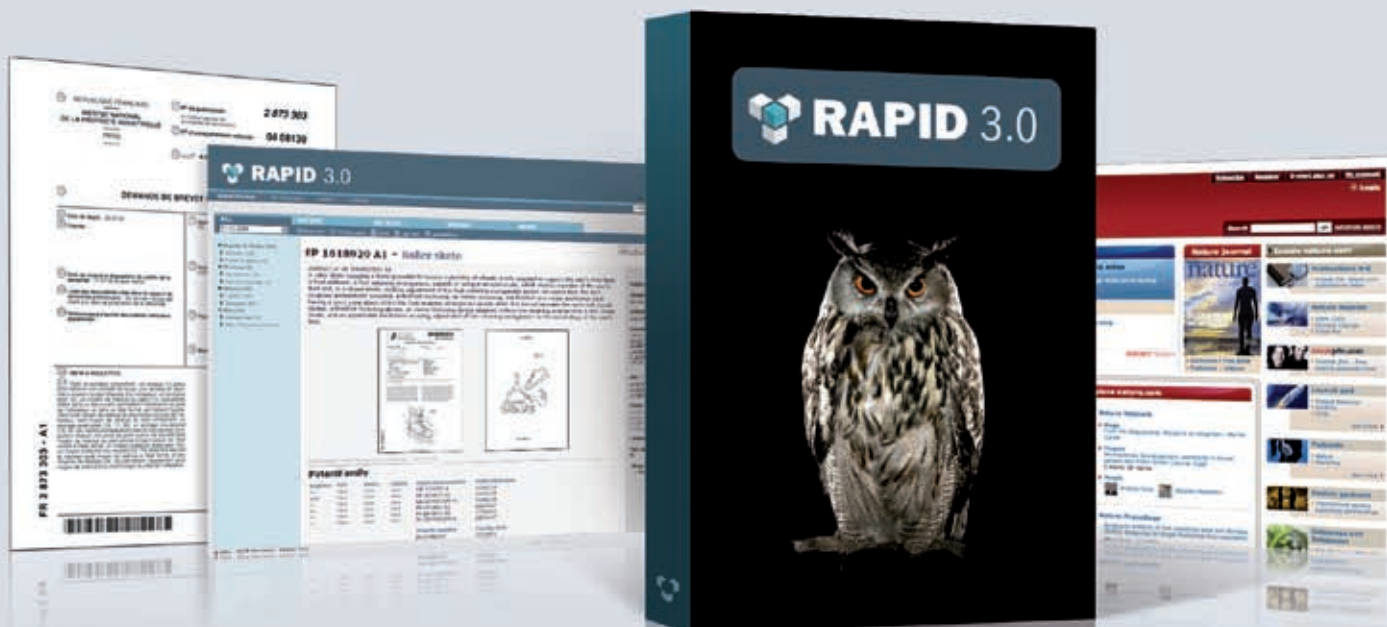

- Combine content from major sources (Questel, Thomson, STN, OEB, etc.)
- Display patent description, claims and designs in mosaic view
- View patents' full-text (in PDF), family, legal status and European register records
- Set up automated alerts on selected legal events
- Create user-defined and user-specific patent collection
- Export data in Word, Excel, PDF, or XML formats

NEWS

- RSS Format
- Centralized news feed
- Create newsletters on specific topics
- Automated alerts on keywords and news

ARTICLES

- Multiple sources (Inspec, WoS...)
- Multilingual
- XML import
- On the fly input
